

## Table of Contents

Preface.....	i
Acknowledgment .....	iii
Table of Contents .....	v
List of Figures .....	ix
List of Tables.....	xi
List of Abbreviations.....	xiii
1 Introduction .....	1
1.1 Motivation and Problem Statement .....	1
1.2 Research Questions and Goals.....	6
1.3 Research Design .....	13
1.4 Thesis Structure .....	16
2 Fundamentals of Supply Chain Coordination .....	19
2.1 Types of Supply Chain Collaborations.....	19
2.2 The Role of Inter-Organizational Coordination in Collaborations.....	23
2.2.1 Organizational-Theoretical Perspectives on Supply Chain Collaboration.....	23
2.2.2 Inter-Organizational Coordination Mechanisms.....	24
2.3 Supply Chain Coordination Mechanisms .....	25
2.3.1 Coordinating Transactional Relationships.....	28
2.3.2 Coordination of Hierarchical Relationships.....	31
2.3.3 Coordination in Heterarchical Supply Chains .....	33
2.3.3.1 Coordinating Contracts .....	33
2.3.3.2 Upstream Planning.....	37
2.3.3.3 Collaborative Planning .....	38
2.4 Discussion of Focused-On Coordination Mechanisms.....	42
3 Collaborative Supply Chain Planning.....	45
3.1 Types of Collaborative Planning-Based Coordination Mechanisms.....	46
3.1.1 Collaborative Planning in a Narrower Sense .....	47
3.1.1.1 Exact Mathematical Decomposition Mechanisms.....	47
3.1.1.2 Heuristic-Based Mathematical Decomposition Mechanisms...	53
3.1.1.3 Hierarchical Anticipation Mechanisms .....	59
3.1.2 Collaborative Planning in a Broader Sense .....	63
3.1.2.1 Centralized Planning and Information-Sharing .....	63
3.1.2.2 Collaboration Schemes .....	64
3.1.3 Alternative Perspectives on Collaborative Planning.....	67
3.1.3.1 Multi-Agent Systems in Collaborative Planning.....	67
3.1.3.2 Decision-Model and Application Domain-Centric Classification of Mechanisms.....	70
3.1.3.3 Subsumed Mechanism-Types .....	71
3.2 Discussion of Focused-on Collaborative Planning Coordination Mechanisms .	72
3.3 Building-Blocks of Collaborative Planning Concepts.....	73
3.4 Process Characteristics of Collaborative Planning Concepts .....	76
3.4.1 Characteristics Influenced by the Coordinated Supply Chain .....	77

3.4.2	Coordination Approach-Specific Characteristics .....	79
3.5	Leading Case Studies.....	81
3.5.1	Collaborative Demand and Capacity Network Planning.....	84
3.5.2	Integrated Vehicle-Routing and Lot-Sizing Problem .....	86
3.5.3	Extended Upstream Planning.....	89
3.6	Implications for the Design and Evaluation of Collaborative Planning Concepts .....	91
4	Framework Requirements .....	93
4.1	Addressed Decision Situation.....	93
4.2	High-Level Requirements Analysis.....	95
5	State-of-the-Art in the Design and Evaluation of Collaborative Planning Concepts....	99
5.1	Identifying and Selecting Coordination Mechanisms.....	100
5.2	Modeling, Simulating and Implementing Decentralized Systems .....	106
5.3	Software Engineering Methods .....	113
6	Framework Fundamentals .....	119
6.1	Method for the Design and Evaluation of Collaborative Planning Concepts...	119
6.2	Collaborative Planning Artifacts .....	121
7	Applicability Assessment for Collaborative Planning Concepts and Artifacts .....	131
7.1	Overview and Approach of the Assessment Component .....	131
7.2	Classification of Supply Chains Coordination Problems and Solutions .....	134
7.2.1	Classification Structure.....	134
7.2.2	Classification Attributes.....	135
7.2.2.1	Supply Chain Structure and Actor-Relationships.....	135
7.2.2.2	Supply Chain Decision Situation.....	142
7.2.2.3	Solution Characteristics .....	146
7.3	Matching the Problem and Solution Views .....	150
7.3.1	General Proceeding.....	150
7.3.2	Complete Matches in the Concept Library .....	151
7.3.3	Partial Matches in the Concept Library .....	153
7.3.3.1	Non-Relaxation and Relaxation Attributes.....	154
7.3.3.2	Influencing Solution Attributes .....	156
7.3.3.3	Relaxation Method and Transfer Rules .....	157
7.4	Reflection of the Assessment Component.....	161
8	Modeling Collaborative Planning Concepts .....	163
8.1	Overview of the Modeling Component .....	163
8.2	Modeling Collaborative Planning Concepts in the Business Perspective .....	164
8.2.1	Modeling Purpose and Requirements .....	164
8.2.2	Modeling Language Identification and Selection .....	169
8.2.3	Modeling Method.....	173
8.2.3.1	Basic Assumptions.....	173
8.2.3.2	Interaction View .....	175
8.2.3.3	Combined View .....	178
8.2.3.4	Local View.....	182
8.2.4	Reflection of the Business Perspective .....	183
8.3	Modeling Collaborative Planning Concepts in the IS Perspective .....	184
8.3.1	Modeling Purpose and Requirements .....	184

8.3.2	Modeling Language Identification and Selection .....	189
8.3.3	Modeling Method.....	192
8.3.3.1	Basic Assumptions.....	192
8.3.3.2	Information View.....	193
8.3.3.3	Interaction View .....	196
8.3.3.4	Combined View .....	197
8.3.3.5	Local View.....	200
8.3.4	Reflection of the Information System Perspective .....	207
8.4	Reflection of the Modeling Component .....	208
9	Evaluating Collaborative Planning Concepts.....	211
9.1	Overview of the Evaluation Component .....	211
9.2	Collaborative Planning Artifact Implementation.....	212
9.2.1	Transformation of UML Class Models to Java Classes.....	213
9.2.2	Preparing Scenario Parameterizations: XML Schema Generation .....	214
9.2.3	Implementation of Internal Tasks .....	216
9.3	Specification of Simulation Experiments .....	217
9.3.1	General Simulation Aspects.....	218
9.3.2	Experimental Simulation Aspects.....	220
9.4	Code Generation and Simulation.....	222
9.5	Reflection of the Evaluation Component .....	224
10	Framework Evaluation .....	227
10.1	Overview of the Evaluation Concept.....	227
10.2	Influences of the Extended Upstream Planning Case Study .....	229
10.3	The Integrated Vehicle Routing and Lot-Sizing Case Study.....	230
10.3.1	Application of the Modeling Component .....	230
10.3.2	Application of the Evaluation Component .....	231
10.3.3	Results and Framework Design Implications .....	234
10.4	The Collaborative DCNP Case Study.....	235
10.4.1	Application of the Modeling Component .....	236
10.4.2	Application of the Evaluation Component .....	239
10.5	Evaluation of the Assessment Component .....	244
10.6	Reflection of the Framework .....	250
11	Conclusion and Outlook.....	253
	References .....	257
	Appendix A Literature Reviews.....	273
	Appendix A.a Overview and Description of Collaborative Planning Concepts .....	273
	Appendix A.b Review of Followed Design, Modeling and Evaluation Approaches .....	285
	Appendix B Negotiation Protocol of the Collaborative DCNP .....	291
	Appendix C Collaborative Planning Concept Library .....	295
	Appendix D Transfer Rules for Attribute Relaxation .....	305
	Appendix D.a Concession Strategy .....	305
	Appendix D.b Rolling Horizons .....	306
	Appendix D.c Initial Solution.....	307

Appendix D.d	Compensation Payments .....	308
Appendix D.e	Number of Actors on Tier .....	310
Appendix D.f	Number of Tiers .....	312
Appendix D.g	Local Decision Models .....	314
Appendix E	Detailed Requirements Analysis of Business Process Modeling Languages .....	317
Appendix F	Detailed Requirements Analysis of MAS Modeling Languages.....	319
Appendix G	Reference for Information Modeling in Collaborative Planning.....	323
Appendix G.a	TimeModel.....	323
Appendix G.b	SourcingModel.....	324
Appendix G.c	NetworkConstraintModel.....	324
Appendix G.d	DemandConstraintModel .....	325
Appendix G.e	ResourceModel .....	326
Appendix G.f	AdjustmentMeasureModel.....	326
Appendix H	Case Study Framework Application (Collaborative DCNP).....	327
Appendix H.a	DSML4MAS Models .....	327
Appendix H.b	Java Implementation Overview.....	331
Appendix H.c	Validation Plan.....	332
Appendix H.d	Suggested Improvements to the Concept.....	333
Appendix I	Case Study Framework Application (IVRLSP) .....	343
Appendix I.a	Models in the Business Perspective .....	343
Appendix I.b	DSML4MAS Models .....	346
Appendix I.c	UML Models .....	349
Appendix I.d	Details on Case Study Parameters.....	350
Appendix I.e	Detailed Simulation Results .....	350
