1 Introduction	1
1.1 Light over time	1
1.2 Imaging with electromagnetic waves	6
1.3 Multistatic imaging	8
1.4 Potential applications	11
1.5 Challenges	13
1.6 Methodology	16
2 Multistatic Array Imaging	17
2.1 Electromagnetic field relations	18
2.2 Scattering in a source-free region	20
2.3 Born approximation	23
2.4 Validity of Born approximation	24
2.5 The imaging problem	27
2.6 Image reconstruction	29
2.6.1 Space domain representation	30
2.6.2 Spatial frequency domain representation	31
2.7 Image properties	33
2.7.1 Spatial spectrum	33
2.7.2 Spatial resolution	41
2.7.3 Point spread function	46
2.7.4 Illumination and shadowing	49
2.8 Multistatic arrays	50
2.8.1 The simple design	50
2.8.2 Effective aperture concept	50
2.8.3 Design guidelines	53
2.8.4 Design examples	55
2.9 One-square-meter array	64
2.9.1 Array geometry	64
2.9.2 Focusing quality	67
2.9.3 Measurement verifications	72
2.10 Conclusion	76

3	Illumination in Reflection Imaging	77
3.1	Theoretical background	77
3.2	Illumination boundaries	78
3.3	Illumination equalization	81
3.4	Processing gain	85
3.4.1	Diffuse reflections	85
3.4.2	Specular reflections	86
3.4.3	Experimental verification	89
3.5	Simulation method	90
3.6	Illumination on human body	95
3.7	Conclusion	100
4	Calibration of Multistatic Arrays	101
4.1	Error model	102
4.2	System error correction	104
4.3	Practical aspects	106
4.3.1	Signal-to-noise ratio	106
4.3.2	Cross-coupling	107
4.3.3	Multiple reflections	107
4.3.4	Clutter	108
4.3.5	Temperature variations	108
4.4	Sphere as a reflector	109
4.4.1	Problem definition	109
4.4.2	Known solutions	110
4.4.3	Geometrical optics model	115
4.5	Geometry error correction	133
4.5.1	Mathematical development	134
4.5.2	Numerical verifications	137
4.5.3	Geometry search algorithm	140
4.6	Calibration matrix refinement	145
4.6.1	Mathematical development	145
4.6.2	Practical considerations	148
4.6.3	Numerical verification	149
4.7	Conclusion	153
5	Demonstrator	155
5.1	Array design	156
5.2	Hardware description	159
5.2.1	Signal sources	161
5.2.2	Array front-end	161
5.2.3	Control units	162
5.2.4	Measurement acquisition	164
5.3	Signal processing	166

5.4	System calibration	168
5.5	Imaging results	170
5.6	Conclusion	175
6	Summary	177
	Appendix A Scalar Green's Function	181
	Appendix B Fourier Transform Definitions	184
	Appendix C Fourier Transform over 2D Aperture	186
	Appendix D Image Gallery	190
	Symbols and Acronyms	205
	Bibliography	211
