List of Algorithms xi

Frequently used abbreviations xiii

Introduction 1
Motivation . . . 1
Contributions of the thesis . . . 3
Organization of the manuscript . . . 4

1. Ambient Assisted Living, Smart Home and indoor Location Tracking 5
Introduction . . . 5
1.1. Ambient Assisted Living and Smart Home . . . 5
1.1.1. Definitions . . . 5
1.1.2. Acceptance of home automation by the inhabitants . . . 7
1.2. Different applications . . . 8
1.2.1. Comfort monitoring . . . 8
1.2.2. Safety ensuring . . . 9
1.2.3. Health problems detection . . . 9
1.3. Different approaches . . . 12
1.3.1. Activities of Daily Living recognition . . . 13
1.3.2. Activity monitoring . . . 13
1.3.3. Inactivity monitoring . . . 13
1.3.4. Location Tracking . . . 15
1.4. Different sensors . . . 19
1.4.1. Wearable sensors . . . 20
1.4.2. Ambient sensors . . . 20
1.5. Problem statement of explicit-model-based Location Tracking . . . 21
Conclusion . . . 23

2. Modeling of the detectable motion of inhabitants in a Smart Home 25
Introduction . . . 25
2.1. Detectable motion of a single inhabitant . . . 25
2.1.1. Overview of different approaches for modeling . . . 26
2.1.2. Presentation of the case study . . . 27
2.1.3. Manual construction of a model by expert knowledge . . . 28

2.1.4. Systematic generation of a model . . . 28
2.1.5. Granularity of the model . . . 38
2.1.6. Conclusion on the modeling for a single inhabitant . . . 44
2.2. Detectable motion of N inhabitants . . . 44
2.2.1. Simplified case study . . . 45
2.2.2. Extended models of single inhabitant's detectable motion . . . 46
2.2.3. Composition of the single models and considerations on sensor events . . . 49
2.2.4. Model reduction considering non distinguishable inhabitants . . . 52
2.2.5. Conclusion on the modeling for multiple inhabitants . . . 54
Conclusion . . . 54

3. Online Location Tracking of the inhabitants **57**
Introduction . . . 57
3.1. Single Inhabitant Location Tracking . . . 58
3.1.1. Construction of a state estimator . . . 58
3.1.2. Algorithms for model-based Location Tracking . . . 58
3.1.3. Illustration on the case study . . . 60
3.2. N-Inhabitants Location Tracking . . . 62
3.2.1. Construction of a state estimator . . . 62
3.2.2. Algorithms for model-based Location Tracking . . . 63
3.2.3. Illustration on the case study . . . 63
3.3. Location Tracking of an *a priori* unknown number of inhabitants . . . 66
3.3.1. Illustration of the concept on the case study . . . 66
3.3.2. Algorithm for model-based number of inhabitants estimation and Location Tracking . . . 67
3.4. Influence of sensor faults on the Location Tracking procedure . . . 70
3.4.1. General considerations on faults . . . 70
3.4.2. Fault Detection and Isolation . . . 72
3.4.3. Illustration on a case study . . . 74
3.4.4. Discussion on fault-tolerant Location Tracking . . . 78
Conclusion . . . 79

4. Performance evaluation for Location Tracking **81**
Introduction . . . 81
4.1. Analytical evaluation . . . 82
4.1.1. Unlocationable zones . . . 82
4.1.2. Accurate-location-ability . . . 83
4.1.3. Maximal number of trackable inhabitants . . . 85
4.2. Iterative procedure for model-building and analytical evaluation . . . 86
4.3. Simulation-based evaluation . . . 87
4.3.1. Time-based confusion matrix and derived criteria . . . 89
4.3.2. Event-driven confusion matrix and derived criteria . . . 91
4.3.3. Illustration on a case study . . . 93
4.4. Evaluation-aided improvement of Smart Home's instrumentations . . . 94
4.4.1. Overview of the proposed approach . . . 94
4.4.2. Illustration on a case study . . . 96
Conclusion . . . 101

Conclusion **103**
Summary . . . 103
Outlook . . . 104

Extended summaries in French and German **105**
Résumé en langue française . . . 105
Kurzfassung in deutscher Sprache . . . 110

Bibliography **115**

Appendix: Software implementation of the emulated Smart Home **121**
Introduction . . . 121
I. Implementation of the Smart Home emulator . . . 122
II. Implementation of the online Location Tracking . . . 125
III. Implementation of the online performance evaluator . . . 125
IV. Illustration on a simulated scenario . . . 126
Conclusion . . . 127
