

Content

1	Synopsis	1
1.1	Why are dynamic faces interesting?	1
1.2	How to study facial motion?	3
1.3	Models of face perception	6
1.4	The role of facial motion in identity processing	8
1.5	Thesis overview and discussion	10
1.6	Conclusion	15
1.7	References	16
1.8	Declaration of contribution	21
2	Quantifying human sensitivity to spatio-temporal information in dynamic faces	23
2.1	Abstract	23
2.2	Introduction	23
2.3	Material and methods	27
2.4	Results	36
2.5	Discussion	39
2.6	Conclusions	43
2.7	Appendix	44
2.8	References	47
3	Identity information in facial motion varies with the type of facial movement	51
3.1	Abstract	51
3.2	Introduction	52
3.3	Methods	56
3.4	Results	62
3.5	Discussion	64
3.6	Conclusion	68
3.7	References	69

4	Attention to dynamic faces enhances the neural representation of expression and identity in the human face processing system	73
4.1	Abstract	73
4.2	Introduction	73
4.3	Methods	75
4.4	Results	85
4.5	Discussion	91
4.6	References	97
