

Table of contents

PREFACE	
CHAPTER 1	1
Stabilization of food dispersions by enzymes	
CHAPTER 2	49
Crosslinking of interfacial layers in multilayered oil-in-water emulsions using laccase: Characterization and pH-stability	
CHAPTER 3	77
Crosslinking of interfacial layers affects the salt and temperature stability of multilayered emulsions consisting of fish gelatin and sugar beet pectin	
CHAPTER 4	103
Influence of interfacial properties on Ostwald ripening in crosslinked multilayered oil-in-water emulsions	
CHAPTER 5	127
Influence of layer thickness and composition of crosslinked multilayered oil-in-water emulsions on the release behavior of lutein	
CHAPTER 6	151
Heat- and laccase-induced crosslinking of adsorbed biopolymer nanoparticles affects pH-stability of WPI-stabilized oil-in-water emulsions	
CHAPTER 7	177
Influence of oil droplet concentration on transglutaminase-induced gelation of oil-in-water emulsions	
Concluding remarks and outlook	201
Summary	205
Zusammenfassung	207
