<b>Abstract</b>	<b>xiii</b>
<b>Deutsche Kurzfassung</b>	<b>xv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Research motivation . . . . .	1
1.2 Overview on the research topic . . . . .	2
1.2.1 Cell type transitions . . . . .	2
1.2.2 Established modeling approaches . . . . .	2
1.2.3 Open problems . . . . .	3
1.3 Contribution of this thesis . . . . .	4
1.4 Outline of this thesis . . . . .	5
<b>2 Modeling and analysis of a gene switch determining cell differentiation</b>	<b>7</b>
2.1 Background and problem formulation . . . . .	7
2.1.1 Biological background of cell differentiation . . . . .	7
2.1.2 Available models for cell differentiation . . . . .	8
2.1.3 Modeling approaches for gene expression dynamics . . . . .	9
2.1.4 Problem formulation . . . . .	10
2.2 A gene switch model for cell differentiation . . . . .	11
2.2.1 Model specification . . . . .	11
2.2.2 Model development . . . . .	15
2.2.3 Model analysis . . . . .	19
2.2.4 Simulations of single cell dynamics . . . . .	21
2.3 Stochastic dynamics on cell population level . . . . .	25
2.3.1 Specification of stochastic dynamics . . . . .	25
2.3.2 A stochastic model of the gene switch . . . . .	26
2.4 Summary and discussion . . . . .	29
<b>3 Construction of multistability-equivalent gene regulatory network models</b>	<b>31</b>
3.1 Background and problem formulation . . . . .	31
3.1.1 Modeling gene regulatory network dynamics . . . . .	31
3.1.2 Problem formulation . . . . .	32
3.2 Construction method . . . . .	34
3.2.1 Specification of the system class . . . . .	34

3.2.2	Construction rules . . . . .	36
3.2.3	Theorem and proof of multistability equivalence . . . . .	38
3.3	Example: Mesenchymal stem cell differentiation . . . . .	44
3.4	Summary and discussion . . . . .	53
<b>4</b>	<b>A general model class for proliferating multi-cell type populations in labeling experiments</b>	<b>55</b>
4.1	Background and problem formulation . . . . .	55
4.1.1	Multi-cell type populations . . . . .	55
4.1.2	Studies on proliferating cell populations . . . . .	56
4.1.3	Available models for multi-cell type populations . . . . .	57
4.1.4	Problem formulation . . . . .	58
4.2	Development and analysis of a general model class . . . . .	58
4.2.1	Development of the model class . . . . .	58
4.2.2	Analysis of the model class . . . . .	63
4.3	Relationship to other models and model classes . . . . .	70
4.3.1	Classification of existing population models as subclasses . . . . .	70
4.3.2	Relationship to gene switch models . . . . .	76
4.4	Summary and discussion . . . . .	82
<b>5</b>	<b>Modeling of CFSE-labeled multi-cell type populations</b>	<b>83</b>
5.1	Background and problem formulation . . . . .	83
5.1.1	CFSE labeling experiments . . . . .	83
5.1.2	Available models for CFSE-labeled cell populations . . . . .	84
5.1.3	Problem formulation . . . . .	85
5.2	Specific model for CFSE-labeled multi-cell type populations . . . . .	85
5.2.1	Model specification . . . . .	85
5.2.2	Model solution and analysis . . . . .	87
5.3	Example: CFSE-labeled stem cell population . . . . .	90
5.3.1	Cell population with asymmetric cell division . . . . .	90
5.3.2	Analysis of cell population dynamics . . . . .	91
5.3.3	Analysis of label distribution dynamics . . . . .	95
5.4	Summary and discussion . . . . .	99
<b>6</b>	<b>Modeling of BrdU-labeled multi-cell type populations</b>	<b>101</b>
6.1	Background and problem formulation . . . . .	101
6.1.1	BrdU labeling experiments . . . . .	101
6.1.2	Available models for BrdU-labeled cell populations . . . . .	102
6.1.3	Problem formulation . . . . .	104
6.2	Specific model for BrdU-labeled multi-cell type populations . . . . .	105
6.2.1	Model specification . . . . .	105
6.2.2	Modeling the DNA label segregation . . . . .	107
6.2.3	Modeling the label concentration . . . . .	114
6.2.4	Model solution . . . . .	118
6.2.5	Modeling the measured label distribution . . . . .	120
6.3	Examples: Model-based studies on BrdU labeling . . . . .	126

6.3.1	Potential sources of heterogeneity in BrdU data . . . . .	126
6.3.2	Estimation of proliferation parameters from BrdU data . . . . .	129
6.4	Summary and discussion . . . . .	135
<b>7</b>	<b>Conclusions</b>	<b>137</b>
7.1	Summary and discussion . . . . .	137
7.2	Outlook . . . . .	139
	<b>Appendix</b>	<b>141</b>
	<b>Bibliography</b>	<b>169</b>
