Contents

Preface **v**

I Preamble **1**

1 Introduction **3**

2 Basic Concepts and Definitions **11**
2.1 Words and Languages 11
2.2 Regular Languages and Regular Expressions 13
2.3 Finite Automata 15
2.4 Computational Complexity 22

II Lossy Compression of Finite Automata **25**

3 Error Profiles **27**
3.1 Almost-Equivalence and Hyper-Minimality 29
3.2 E-Equivalence and E-Minimality 35
3.3 Further Error Profiles 38

4 Complexity of Problems Related to Minimal Finite Automata **41**
4.1 Equivalence Problems 42
4.2 Minimization and Minimality Problems 45
4.2.1 Minimal Deterministic Finite Automata 45
4.2.2 Minimal Nondeterministic Finite Automata 52
4.3 Canonicity Problems 58
4.3.1 Deterministic Finite Automata 60
4.3.2 Nondeterministic Finite Automata 62
4.4 Counting Problems 64

5 Brzozowski-Like Minimization Algorithms **71**
5.1 Structural Characterization of E-Equivalent States 75
5.2 E-Mergeability of States 77
5.3 Hyper-Minimization 81
5.4 Minimal Cover Automata 83
5.5 k-Minimization 86

III Biautomata **89**

6 Basic Properties of Biautomata **91**
6.1 The Biautomaton Model 92
6.2 Structural Properties for Biautomata 96
6.2.1 Biautomata with $\diamond$- and F-property 101

7 Language Classes Related to Different Types of Biautomata **105**
7.1 Linear Context-Free Languages 106
7.2 Regular Languages 116
7.2.1 Subregular Language Classes 117
7.3 The Dual of a Biautomaton 119

8 Descriptional Complexity of Conversions for Biautomata **125**
8.1 From Finite Automata to Biautomata 129
8.2 From Regular Expressions to Biautomata 132
8.3 From Syntactic Monoids to Biautomata 135
8.4 Complexity of the $\diamond$- and F-properties 138

9 Minimization Algorithms for Biautomata **143**
9.1 Efficient State Merging Algorithms 143
9.2 Brzozowski-Like Minimization of Biautomata 147
9.3 On the Importance of the $\diamond$- and F-properties 151

10 Lossy Compression of Biautomata **155**
10.1 On the Structure of Almost-Equivalent Biautomata 156
10.2 Computational Complexity of Biautomata Minimization Problems 162

IV Outro **177**

11 Conclusions and Directions for Further Research **179**

Bibliography **183**

Index **194**
