List of Figures xx

List of Tables xxi

1 Introduction 1
- 1.1 Motivation and research background . . . 1
- 1.2 Target and contribution to the scientific literature . . . 1
- 1.3 Structure of the thesis . . . 2

2 Fundamentals 5
- 2.1 Literature review on distributed electricity generation and self-consumption 5
  - 2.1.1 PV-Battery . . . 5
  - 2.1.2 Heat pump . . . 7
  - 2.1.3 Combined heat and power . . . 8
  - 2.1.4 Integrated operation and system sizing for house energy systems 9
  - 2.1.5 Intermediate summary and conclusions . . . 11
- 2.2 Description of employed generation and storage technologies . . . 14
  - 2.2.1 Electrical generation technologies . . . 14
  - 2.2.2 Heat generation technologies . . . 17
  - 2.2.3 Electrochemical storage technologies . . . 20
  - 2.2.4 Thermal storage technologies . . . 22
- 2.3 Fundamentals of mathematical optimization . . . 23
  - 2.3.1 Overview and classification of optimization problems . . . 23
  - 2.3.2 Formulation of linear programming problem . . . 24
  - 2.3.3 Formulation of mixed integer linear programming problem . . . 24
- 2.4 Fundamentals of economical calculations . . . 25
- 2.5 Metrics for self-consumption of electricity . . . 27

3 Model description 29
- 3.1 Overview of the modeling approach . . . 29
- 3.2 Structure of the optimization model . . . 30
  - 3.2.1 Structure of the optimization model . . . 30
  - 3.2.2 Model versions . . . 31
- 3.3 Model formulation . . . 32
  - 3.3.1 Overview of employed sets . . . 32

3.3.2 Formulation of target function . . . 33
3.3.3 Power flow balance constraints . . . 35
3.3.4 Constraints for generation technologies . . . 37
3.3.5 Constraints for storage technologies . . . 39
3.3.6 Constraints for investment decision . . . 40
3.4 Mixed integer linear operation model . . . 41

4 Boundary conditions and scenario assumptions 45
4.1 Physical boundary conditions . . . 45
4.1.1 Weather and irradiation data . . . 45
4.1.2 Electricity demand . . . 45
4.1.3 Space heating demand . . . 47
4.1.4 Hot water demand . . . 48
4.2 Technology data . . . 48
4.2.1 Technical parameters . . . 49
4.2.2 Technology costs . . . 50
4.3 Scenario assumptions . . . 51
4.3.1 General financial parameters . . . 52
4.3.2 Electricity and gas prices . . . 52
4.3.3 Feed-in-tariff . . . 53
4.3.4 Variable electricity prices and feed-in-tariffs . . . 54
4.3.5 Scenario overview . . . 55

5 Model discussion and analysis 57
5.1 Influence of temporal resolution on PV-battery systems . . . 57
5.1.1 Literature review on temporal resolution of load and PV profiles 57
5.1.2 Influence of the temporal resolution on the level of self-consumption 58
5.1.3 Influence of the temporal resolution on the optimal sizing . . . 66
5.2 Mixed integer linear operation for heat pumps . . . 70
5.2.1 System sizing . . . 70
5.2.2 Influence of minimum power constraint . . . 71
5.2.3 Influence of start-up constraint . . . 74
5.2.4 Discussion of the results . . . 75
5.3 Mixed integer linear operation for combined heat and power . . . 77
5.3.1 System sizing . . . 77
5.3.2 Influence of minimum power constraint . . . 78
5.3.3 Influence of start-up constraint . . . 79
5.3.4 Discussion of the results . . . 81
5.4 Summary and conclusions . . . 83
5.4.1 Influence of temporal resolution on PV-battery systems . . . 83
5.4.2 Mixed integer linear operation model . . . 84

6 Scenario computations 87
6.1 Overview of scenarios . . . 87

6.2 Heat pump based systems 88
6.2.1 Results of base scenarios 88
6.2.2 Results of sensitivity analysis 91
6.2.3 Results of regulatory scenario variations 98
6.2.4 Discussion and conclusions 101
6.3 Gas boiler based systems 102
6.3.1 Results of base scenarios 102
6.3.2 Results of sensitivity analysis 104
6.3.3 Results of regulatory scenario variations 110
6.3.4 Discussion and conclusions 113
6.4 Solid oxide fuel cell based systems 114
6.4.1 Results of base scenarios 114
6.4.2 Results of sensitivity analysis 116
6.4.3 Results of regulatory scenario variations 120
6.4.4 Discussion and conclusions 122
6.5 Summary and conclusions 123

7 Conclusions and Outlook **127**
7.1 Summary 127
7.2 Conclusions 127
7.3 Outlook 130

Bibliography **142**

A Electrical load profiles **143**

Selbstständigkeitserklärung **145**

Bibliographische Beschreibung **147**
