Zusammenfassung	V
Abstract	VII
Contents	IX
Abbreviations	XIII
1 Introduction	1
1.1 Motivation	1
1.2 Outline of this work.....	3
2 Scientific background	5
2.1 Supported metal oxides in catalysis.....	5
2.1.1 Support material	5
2.1.2 Supported iron oxides	6
2.1.3 Supported iron and molybdenum mixed oxides.....	7
2.2 Selective oxidation reactions	8
2.3 Supported iron oxides in selective oxidation reactions.....	9
3 Characterization methods	11
3.1 Introduction.....	11
3.2 Nitrogen physisorption.....	11
3.3 Diffuse reflectance UV-Vis spectroscopy	13
3.4 X-ray absorption spectroscopy.....	14
3.5 Powder X-ray diffraction	16
3.6 Temperature-programmed reduction	17
3.7 Solid-state kinetic analysis	17
3.8 Catalytic characterization.....	18
3.9 Thermal analysis.....	19
3.10 Mössbauer spectroscopy	19
3.11 Raman spectroscopy	20
3.12 X-ray fluorescence analysis	21
4 SBA-15 as suitable support material	23
4.1 Introduction.....	23
4.2 Experimental	23
4.2.1 Synthesis of SBA-15 support material.....	23

4.2.2	Characterization of SBA-15 support material	23
4.3	Structural characterization.....	24
4.4	Catalytic performance	26
4.5	Thermal stability.....	27
4.6	Stability under reaction conditions	28
4.7	Conclusion	30
5	Synthesis and characterization of Fe_xO_y/SBA-15 catalysts using various precursors ..	31
5.1	Introduction.....	31
5.2	Experimental	31
5.2.1	Sample preparation.....	31
5.2.2	Sample characterization.....	34
5.3	Structural characterization of Fe _x O _y /SBA-15 catalysts.....	38
5.3.1	Pore structure and surface properties	38
5.3.2	Long-range ordered structure of Fe _x O _y /SBA-15.....	43
5.3.3	Diffuse reflectance UV-Vis, Raman, and Mössbauer spectroscopy.....	45
5.3.4	Local structure of Fe _x O _y /SBA-15.....	58
5.3.5	Chemical memory effect of Fe _x O _y /SBA-15	71
5.3.6	Conclusion of structural characterization	72
5.4	Reducibility of Fe _x O _y /SBA-15 catalysts.....	73
5.4.1	Importance of reducibility for Fe _x O _y /SBA-15 catalysts	73
5.4.2	Temperature-programmed reduction with hydrogen.....	74
5.4.3	Solid-state kinetic analysis of Fe _x O _y /SBA-15 under non-isothermal conditions..	76
5.4.4	Correlation between solid-state kinetic analysis and structural characterization	95
5.5	Characterization under catalytic conditions	96
5.5.1	Introduction.....	96
5.5.2	Estimation of gas phase diffusion effects and gas phase transport limitations ..	96
5.5.3	Catalytic performance in selective oxidation of propene.....	98
5.5.4	Structural evolution under catalytic conditions.....	103
5.5.5	Influence of β-FeOOH-like species on catalytic performance.....	114
5.5.6	Influence of Fe _x O _y reducibility on catalytic performance	115
5.5.7	A comparison of catalytic performance dependent on precursor	117

5.5.8	Correlation between catalytic performance, structural, and solid-state kinetic properties of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	121
5.6	Interpretation of differences in structural and solid-state kinetic properties of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts and their impact on catalytic performance.....	122
5.7	Conclusion	125
6	Influence of powder layer thickness during calcination on $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts ..	129
6.1	Introduction.....	129
6.2	Experimental	129
6.2.1	Sample preparation.....	129
6.2.2	Sample characterization.....	131
6.3	Structural characterization of $\text{Fe}_x\text{O}_y/\text{SBA-15_Th}$ catalysts.....	133
6.3.1	Pore structure and surface properties	133
6.3.2	Long-range ordered structure of $\text{Fe}_x\text{O}_y/\text{SBA-15_Th}$	138
6.3.3	Diffuse reflectance UV-Vis spectroscopy	140
6.3.4	Correlation between Fe_xO_y species size and powder layer thickness during calcination	144
6.4	Reducibility of $\text{Fe}_x\text{O}_y/\text{SBA-15_Th}$ catalysts.....	146
6.4.1	Temperature-programmed reduction with hydrogen.....	146
6.4.2	Solid-state kinetic analysis of $\text{Fe}_x\text{O}_y/\text{SBA-15_Th}$ under non-isothermal conditions	148
6.4.3	Correlation between solid-state kinetic analysis and structural characterization	158
6.5	Catalytic performance in selective oxidation of propene.....	159
6.6	Interpretation of structural and solid-state kinetic properties of $\text{Fe}_x\text{O}_y/\text{SBA-15_Th}$ catalysts and their impact on catalytic performance.....	165
6.7	Conclusion	167
7	Influence of molybdenum addition on $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	171
7.1	Introduction.....	171
7.2	Experimental	171
7.2.1	Sample preparation.....	171
7.2.2	Sample characterization.....	173
7.3	Structural characterization of $\text{Mo}_x\text{O}_y_ \text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	175
7.3.1	Mesoporous structure of $\text{Mo}_x\text{O}_y_ \text{Fe}_x\text{O}_y/\text{SBA-15}$	175
7.3.2	Diffuse reflectance UV-Vis spectroscopy	179

7.3.3	Possible interactions between ferric and molybdc species	184
7.4	<i>In situ</i> characterization.....	185
7.4.1	Reducibility of $\text{Mo}_x\text{O}_y\text{-Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	185
7.4.2	Catalytic performance in selective oxidation of propene.....	189
7.5	Correlation between molybdenum induced effects and catalytic performance ..	192
7.6	Interpretation of molybdenum induced differences in structure and reducibility of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts and their impact on catalytic performance.....	195
7.7	Conclusion	196
8	Summary and outlook	199
8.1	Introduction.....	199
8.2	Support material	199
8.3	Structure of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts.....	200
8.4	Chemical memory effect of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	200
8.5	Applicability of solid-state kinetic analysis.....	201
8.6	Structure-activity correlations of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts dependent on precursor...	201
8.7	Influence of powder layer thickness during calcination on structural and solid-state kinetic properties of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	202
8.8	Influence of powder layer thickness during calcination on structure-activity correlations of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	204
8.9	Influence of molybdenum addition on mesoporous structure of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts.....	205
8.10	Dispersion and electronic effect of molybdenum addition on $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts	205
8.11	Enhanced catalytic performance of $\text{Fe}_x\text{O}_y/\text{SBA-15}$ catalysts due to molybdenum addition	206
8.12	Outlook.....	206
