

# CONTENT

I. MULTIVARIATE STIRLING POLYNOMIALS	9
1 Introduction . . . . .	9
2 Function algebra with derivation . . . . .	14
3 Expansion of higher-order derivatives . . . . .	18
4 A brief summary on Bell polynomials . . . . .	25
5 Inversion formulas and recurrences . . . . .	29
6 Explicit formulas for $S_{n,k}$ . . . . .	34
7 Remarks on Lagrange inversion . . . . .	42
8 Concluding remarks . . . . .	47
NOTES AND SUPPLEMENTS . . . . .	48
II. INVERSE RELATIONS AND RECIPROCITY LAWS	57
1 Introduction . . . . .	57
2 Basic notions and preliminaries . . . . .	60
3 Polynomials from Taylor coefficients . . . . .	67
4 Composition rules . . . . .	77
5 Representation by Bell polynomials . . . . .	83
6 Applications to binomial sequences . . . . .	97
7 Lagrange inversion polynomials . . . . .	105
8 Reciprocity theorems . . . . .	116
NOTES AND SUPPLEMENTS . . . . .	125
APPENDIX: A MATHEMATICA PACKAGE	141
BIBLIOGRAPHY	147
