Acknowledgements.....	5
Kurzfassung der Dissertation	7
Abstract	9
List of Symbols	13
1 Introduction	19
1.1 Overview of autoclave processing.....	19
1.2 Motivation and research objectives	21
1.3 Thesis outline	24
2 Theoretical background	27
2.1 Autoclave processing models	27
2.2 Description of heat transfer in autoclave processing	27
2.3 Characterization of convective heat transfer.....	29
2.3.1 Measurement.....	29
2.3.2 Analytical calculation.....	29
2.4 Governing equations	30
2.4.1 Continuity equation	31
2.4.2 Momentum equation	31
2.4.3 Energy equation	31
2.4.4 Equations of state.....	31
2.5 Cure kinetics.....	32
3 Modeling approach	35
3.1 Finite volume method	35
3.1.1 Model assumption.....	35
3.1.2 Integral forms of the general transport equations	36
3.1.3 Discretized systems of equations	36
3.1.4 Element description	37
3.2 Finite element method	38
3.2.1 Discretized system of equations	38
3.2.2 Element description	39
3.2.3 Solution process.....	39
3.3 Turbulence modeling	39
3.3.1 Spalart-Allmaras model	40
3.3.2 k - ε model	40

3.3.3	<i>k</i> - ω SST model	41
3.4	Thermo-physical property of composite material	41
3.4.1	Density.....	41
3.4.2	Specific heat capacity	41
3.4.3	Thermal conductivity.....	41
3.5	Computational chain.....	42
3.5.1	Simulation process and boundary condition definition	42
3.5.2	General coupling procedure	43
3.6	Summary and Discussion	44
4	CFD simulation and validation	47
4.1	Numerical scheme	47
4.2	Mesh independency study	47
4.2.1	Interface level	48
4.2.2	Part region.....	51
4.2.3	Autoclave scale.....	54
4.3	Model optimization	65
4.4	Validation	66
4.4.1	Validation of the heat transfer coefficients.....	67
4.4.2	Validation of the temperature fields.....	67
4.5	Conclusion	68
5	Quasi-transient coupling approach.....	75
5.1	Assumptions and limitations	75
5.2	Time scale analysis.....	76
5.3	Coupling scheme	77
5.4	Numerical algorithm	77
5.5	Validation and case study.....	78
5.5.1	Case 1	78
5.5.2	Case 2.....	86
5.6	Conclusion	88
6	Experimental and numerical study in composite manufacturing	93
6.1	Experiment.....	93
6.1.1	Measurement of the heat transfer coefficients	93
6.1.2	Measurement of the temperature distribution	95
6.2	Simulation	100
6.2.1	Modeling	100
6.2.2	Material description.....	100
6.2.3	Numerical scheme	101
6.2.4	Validation.....	101
6.2.4.1	Overview	101
6.2.4.2	Validation of the heat transfer coefficients	102

6.2.4.3	Calibration of the inlet flow velocity	102
6.2.4.4	Validation of the temperature distribution	104
6.3	Conclusion	110
7	Thermal optimization based on simulation and machine learning	115
7.1	Computational study	115
7.1.1	Material description.....	115
7.1.2	Numerical model and case definition.....	116
7.1.3	Thermal optimization strategy.....	117
7.2	Machine learning-based thermal optimization.....	118
7.2.1	Framework and implementation	118
7.2.2	Machine learning models.....	119
7.2.2.1	Linear regression model	119
7.2.2.2	Neural Network model	119
7.2.3	Training data processing	120
7.3	Results and discussion.....	121
7.4	Conclusion	124
8	Conclusions and further work	127
9	Appendix.....	131
9.1	Supplementary information on data and results.....	131
9.2	List of Abbreviations.....	148
9.3	List of Figures.....	149
9.4	List of Tables	154
	References	155
	Publications and supervised student theses	167
